

Creed's Farm

bury lane | epping

Bermac Properties Plc acquired this site in 2002 with planning permission to transform a derelict farm shop and former restaurant premises into five 2 and 3 bedroom character homes.

As the development was in a conservation area in the metropolitan green belt and in close proximity to a listed building, Bermac retained the external traditional style of the properties, whilst creating modern, stylish interiors with an enviable high specification.

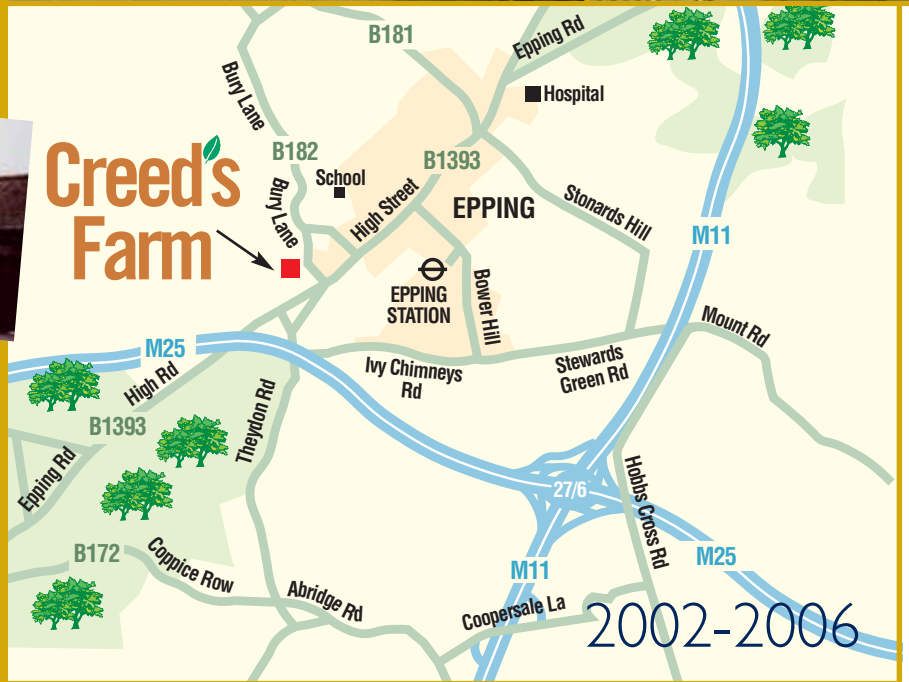

Bermac removed an old car park, constructed a new oak cart lodge, installed external solar lighting and created a new paddock to be used as shared amenity land.

Final completion and occupation of the new homes was in 2006.
